Order-No. 101750 Piece

Basic machine 26,5 HP EFI 19.970,00 €

EFI = electronic fuel injection instead of carburetor

Proportional valves

Cutter bars or other devices attached to the Brielmaier motor mower are activated by pressing the „Equipment ON“ button.

With the standard black/white valve this happens instantly and abruptly.

Order-No. 101060 Piece
Proportional pressure regulation 275,00 €

Order-No. 100265 Piece
Proportional quantity regulation 355,00 €

If a proportional valve (pressure or quantity of oil) is installed, continuously pressing the „Equipment ON“ button (> 1 sec.) and then releasing it, will increase the current and thus the power of the attached equipment, for example a flail mower, over about 6 seconds.

With a proportional pressure regulation the overload protection of currently 220 bar (possible max. 250 bar) can be reduced continuously to 0 bar and subsequently be increased again.

With a proportional quantity regulation devices with different transmission ratios can be driven with their respective ideal speed.

Remote control

All prices are without VAT

Remote control

With the HBC-radiomatic remote control all major functions of the Brielmaier motor mower and the attached equipment can be operated from a distance of up to 500 ft.

With an LC-display and transmission of data from the mower to the control unit.

Ramps, specially designed for the Brielmaier studded roller wheels

The safest way to load and unload a Brielmaier machine. We offer our ramps, specially designed for our studded roller wheels, in three versions to be seen in the pictures below. The basic sections are fixed to the load floor and equipped with a bracket to receive the ramps. After loading the machine the basic sections also provide maximum support for the machine during transport!

Order-No. 103895

Basic section of ramp

Length 630 mm / 2' 1", separate sections, for fixing to the load floor Set
284,00 €

Order-No. 103896

Drive-up section of ramp

incl. bracket* to connect with basic section, Length 1.820 mm / 6' Set
816,00 €

Order-No. 101917

Drive-up section of ramp as above, including basic section 103895 Set
1.100,00 €

Order-No. 103896

Drive-up section of ramp

incl. bracket* to hook into the side panel, Length 1.820 mm / 6' Set
816,00 €

Order-No. 103896

Drive-up section of ramp

incl. bracket* for attaching to the load floor, Length 1.820 mm / 6' Set
816,00 €

* = When ordering, please notify, which bracket shall be used!
